Product overview

Turn WhatsApp conversations and lead follow-up into a measurable revenue operations system. The platform supports standalone operations first, then expands through integrations, automation, API access, executive reporting, and enterprise governance.

Ideal customers

Company owners, sales directors, real estate teams, service businesses, call centers, and WhatsApp-heavy operations teams.

Revenue opportunities

- Recover missed leads and improve response speed.
- Give management one operating view of WhatsApp revenue activity.
- Replace scattered manual follow-up with governed automation.
- Connect WhatsApp operations to CRM, reporting, and executive decisions.

Competitive advantage

- AI Employee Modes
- WhatsApp Revenue OS
- Business Outcome Tracking
- Integration Studio

Market opportunity and why businesses will buy this.

The buying case is not just software convenience. The product converts operational friction into visibility, automation, accountability, and measurable business outcomes.

Market signal

UAE businesses rely heavily on WhatsApp for customer communication, sales, support, bookings, and collections.

Market signal

Most companies still manage conversations manually across phones, spreadsheets, and disconnected CRMs.

Market signal

Owners want direct visibility into missed opportunities, team performance, response time, and revenue impact.

Business value drivers

- Recover missed leads and improve response speed.
- Give management one operating view of WhatsApp revenue activity.
- Replace scattered manual follow-up with governed automation.
- Connect WhatsApp operations to CRM, reporting, and executive decisions.

Live

AI recommendation

Recover missed leads and improve response speed. Give management one operating view of WhatsApp revenue activity.

AI is embedded inside the workflow, not bolted on as a generic chatbot.

Aura Command uses AI to explain data, recommend next actions, summarize activity, trigger workflows, and produce management-ready reporting.

AI Employee Modes

Sales, support, collections, booking, real estate, and operations agents with tone, rules, escalation, and handoff logic.

Business value**AI-native****ROI impact**

WhatsApp Revenue OS

Shared inbox, SLA timers, lead lifecycle, agent assignment, follow-up calendar, templates, and conversion scoring.

Business value**AI-native****ROI impact**

Business Outcome Tracking

Tracks conversations handled, follow-ups automated, deals influenced, manual work reduced, and revenue opportunities.

Business value**AI-native****ROI impact**

Integration Studio

CRM, website forms, WhatsApp Business API, Google Sheets, Zapier, Make, n8n, custom APIs, and field mapping.

Business value**AI-native****ROI impact**

Core modules focused on outcomes.

Each module exists to improve revenue, productivity, visibility, security, automation, or executive decision making.

SW

Shared WhatsApp Inbox

Centralize conversations, owners, SLA status, priority, and customer timeline.

LP

Lead Pipeline

Track New, Assigned, In Conversation, Follow-up Needed, Won, Lost, and Closed.

ML

Missed Lead Detector

Detect unanswered leads, overdue follow-ups, and stalled hot opportunities.

VN

Voice Note Intelligence

Transcription-ready structure, intent detection, suggested replies, and optional voice response path.

AR

AI Reply Engine

Generate summaries, replies, next-best actions, and escalation recommendations.

RA

Revenue Analytics

Measure pipeline, conversion, velocity, team activity, customer sentiment, and attribution.

From daily work to executive visibility.

The customer can start with standalone mode and later connect external systems. Integrations enhance the workflow but are not required for basic operations.

Revenue Operations Health Score and executive reporting.

The score is designed to be understood in under 30 seconds and used in dashboards, monthly summaries, scheduled reports, AI summaries, and investor or owner conversations.

AI recommendation

Recover missed leads and improve response speed. Give management one operating view of WhatsApp revenue activity.

Score inputs

- Average response time
- Missed leads
- Follow-up completion
- Lead conversion
- Agent activity
- Pipeline velocity
- CRM sync success
- Customer engagement

Executive KPIs

- Pipeline value
- Active leads
- Conversion rate
- Team performance
- Missed opportunity alerts
- Revenue forecast

Marketplace, API framework, webhooks, OAuth, logs, and data mapping.

Data mapping is treated as a first-class capability so companies can map external fields, such as `first_name`, into product-specific fields without painful custom work.

Subscription path from small business to enterprise.

The tier model supports simple adoption, professional operations, advanced integrations, and enterprise security without requiring a major redesign.

Capability	Starter	Business	Enterprise
Best fit	Up to 3 users	Up to 25 users	Unlimited users
AI features	Basic AI summaries	Advanced AI insights	Advanced AI, custom reporting, and executive intelligence
Integrations	Manual and core product setup	API access, webhooks, and priority integrations	Custom integrations, SSO-ready, white label, and enterprise governance
Reporting	Executive Dashboard Lite	Scheduled reports and advanced analytics	Board-ready reports, custom reports, and enterprise executive suite
Security	RBAC and tenant isolation	Audit logs, usage limits, and integration controls	SSO-ready, retention policies, advanced audit center, and custom security controls

Designed to scale beyond a single customer demo.

The product foundation supports tenant provisioning, role-based operations, secure integrations, workflow automation, reporting, white label readiness, and customer success systems.

Scalability

- Multi-tenant company workspaces
- Scoped data access by customer workspace
- Usage limits and feature gating
- Scheduled reports and executive exports
- API and webhook extension layer

Future expansion potential

- WhatsApp campaign governance
- Advanced lead source attribution
- AI quality coaching for agents
- Predictive win probability
- Multi-branch revenue operations

Customer Success Center

Knowledge base, guides, release notes, support tickets, feature requests, and product updates.

Enterprise Readiness Score

Admin-only score for security, integrations, automation, reporting, data quality, and user adoption.

Notification Engine

Email, WhatsApp, SMS, webhook, Slack, Microsoft Teams, and in-app notification structure.

Demo flow for owners, investors, partners, and enterprise buyers.

The demo should focus on business outcomes first, then show product depth, integrations, automation, and executive reporting.
